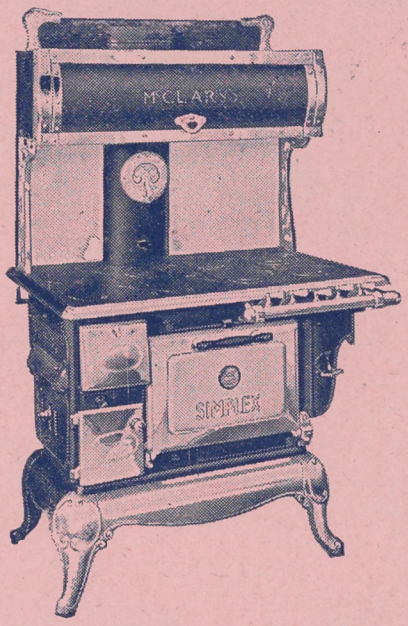
The Simplex Combination Range

Burns Coal or Wood and Gas

For Coal or Wood:

Simply start your fire



For Gas:

Simply turn on the Gas and light it

The big thing about the Simplex is its simplicity and economy. For gas, simply turn on the gas and light it. For Coal or Wood, simply start your fire. Absolutely nothing to take out or put back—a complete Gas Range and complete Range for coal or wood—all in one.

A Twist of the Wrist Changes from Coal to Gas

The same oven is used for all fuels. and both gas and coal or wood can be used at the time in the oven, or on the cooking top.

A hurry-up breakfast can in this way be made with gas for fuel. Simply light the gas, and you have full cooking heat instantly. Muffins can be mixed while the oven is being warmed, and a breakfast to please the most fastidious can be prepared in a jiffy. In the meantime, the coal fire, which, at some seasons of the year, will be burning slow'y all night, can be shaken down and started to warm the kitchen, without interfering with your baking with gas.

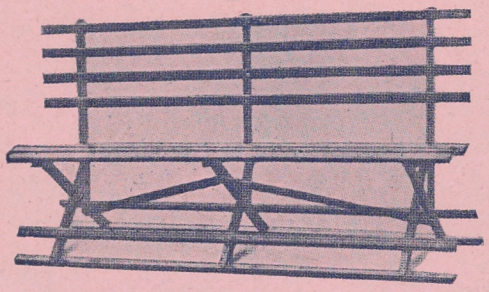
Lawn Rollers

Without a good Roller, a smooth, even lawn is impossible. The Roller illustrated is on the lines of the best English makes. Rounded edges so that it will not cut or tear the turf. 20 inches in diameter by 20 inches wide. Every Roller made in two sections. Handle stands straight up when not in use. Made in 250 lb. and 350 lb. sizes for ordinary lawns. Special Rollers for Cricket, Tennis and Rowing Clubs.



Lawn Settees

Comfortable and will stand hard usage. Well braced—can be folded for storage. Foot-board to protect grass and keep feet from damp. Length 6 feet; weight 40 lbs.

400 of this pattern supplied City of Winnipeg.

Lawn Vases

Beautiful and lasting ornament for lawns, verandahs, balustrades, etc. Painted with handsome Aluminum Bronze. Gives distinction and "class" to your lawn or garden.

Nine of the Principal Cities and Municipalities of Western Canada are Standing Advertisements of the merits of the

Warrenite-Bitulithic Pavement

The Ideal Boulevard

This pavement is constructed by the latest scientific process, and excels all others in durability, ease of maintenance, and is more economical than Block.

Its rough, gritty surface makes it the ideal pavement for driving and motoring. Horses step out freely without fear of slipping, and motor cars do not skid when the pavement is wet.

TRADE MARK REG.

Equally as suitable for business as pleasure, and for economy and comfort in both, this Model in its first year has won great popularity.

It is handsome, rugged, and a delight to drive in either town or country.

In comfort riding it is the equal of the larger car.

In value, it is the usual Overland quality.

The trip was delayed-- the BATTERY was out of order!

MR. AUTOMOBILE OWNER:—

How many times has this happened to you? The business you wanted to close with just a few minutes to spare—**LOST**—because you did not get there within the appointed time—that impromptu "pleasure outing" postponed—all because the **BATTERY** failed you when most needed. Only at such times have you realized the **BATTERY** is the most vital part of your Car. There's no need to run business risks or to mar pleasure any longer! Equip your Car with an

Eternal Battery

which has sufficient capacity to function properly in this North West, where the temperature is so low during winter months. The great trouble with Automobile Batteries is lack of energy during periods of low temperatures. The extra capacity of the **"ETERNAL"** will overcome this trouble.

We are now situated in our new Winnipeg plant, and will be glad to see anyone who is interested in our Battery.

Good Prospects for Your Goods!

Here is an absolutely New and Correct List of Actual Heads of Households—Well-to-do Western Canadian Farmers

It will pay YOU to circularize these prospects. They will buy your goods readily and they have the money. Western Canada Farmers are used to buying by mail—this is a rich, virgin field for the manufacturer. The list of names costs $4.00 per 1000 or we will address your circulars for $5.00 per 1000, in which case it is not necessary to buy the names.

Introductory

THE PUBLISHERS take pleasure in presenting herewith the Forty-third Annual Edition of Henderson's Winnipeg Directory, embracing the area of GREATER WINNIPEG, comprising the City proper, Elmwood, St. Boniface, Norwood, St. Vital, Fort Garry, St. James, St. Charles, Assiniboia, East and West Kildonan.

The Advertising Department presents the names of corporations, firms and individuals who have made Winnipeg the great city that it is, and who are a power in the financial, industrial and commercial world of Western Canada.

The Miscellaneous Section in the front part of the volume contains statistics and information, much of which is not found elsewhere in print.

The value of the street directory is not appreciated to the extent it should be by some who desire to locate a certain house on a street unfamiliar to them. By application of the following example the location of any street number can be found expeditiously: Suppose 368 Langside is wanted: refer to street section, Langside—glance down to 368, then to the nearest intersection to 368. It will be found that this number is on the west side of the street, four houses north of Portage, between Portage and Furby Place.

The Classified Directory contains a complete alphabetically arranged list of all articles manufactured and sold in Winnipeg, which forms a most efficient wholesale and retail buyer's guide.

ADVERTISING WINNIPEG

The Winnipeg Directory is placed in the Directory and Public Libraries throughout the United States and Canada, where it serves the public as a valuable book of reference and the city it represents as a splendid standing advertisement, for no other publication can convey such an idea of the city, its business interests and all the various institutions and organizations. Few people realize what splendid publicity this affords the City and its industries.

POPULATION OF GREATER WINNIPEG

The Directory method of estimating a population is to multiply the individual names the Directory contains by a common multiple. The majority of these names are men, generally the heads of families.

The following figures are submitted as in the opinion of the publishers most nearly representing the growth of population in Winnipeg. They are, however, more in the nature of a calculation. A complete census, only, can give definite and accurate figures.

Year	Estimated Population	Year	Estimated Population
1910	172,865	1916	239,079
1911	204,145	1917	247,367
1912	227,339	1918	262,077
1913	260,436	1919	256,140
1914	276,177	1920	271,958
1915	273,047	1921	282,818

The Publishers desire to thank their patrons and the general public for the courtesy extended, at all times, to their representatives, and to say that they fully appreciate the confidence which the business and professional men of Winnipeg have always shown in their publications.

City of Winnipeg

The City of Winnipeg is the capital of the Province of Manitoba, Canada.

The name WINNIPEG has its origin in the Indian Cree name given to the lake 40 miles north, meaning "Win," muddy, "nipee," water.

Winnipeg is situated in Latitude 49° 54' N., Longitude 97° 08' W., at the confluence of the Red and Assiniboine Rivers; 40 miles south of Lake Winnipeg and 60 miles north of the boundary line between Canada and the United States of America, almost midway between the Atlantic and Pacific Oceans and at an altitude of 760 feet above the seaboard level of New York.

From a Hudson's Bay trading post (Fort Garry) in 1870, with a population of 215, Winnipeg has grown to the size and finish of a first class city of 282,000 people. When the City was incorporated in 1873 there were 1,869 inhabitants. In 1878 steam railway connection from St. Paul, Minn., had reached a point just across the river from Winnipeg; and in 1886 railway communication was established over the Canadian Pacific Railway from the East. With the advent of railway connections a steady stream of travel and trade with influx of population was started and has resulted in the building up of a City of a size and importance that is exceeded by only two cities in the Dominion of Canada.

Winnipeg is now the greatest grain centre on the American continent, and the financial, commercial, wholesale and manufacturing centre of the middle west; owing to its geographical position, its very complete railway facilities, with branches reaching out in very direction, it affords great possibilities for trade in the province and the North-West and an inducement for the establishment of manufacturing and other industries. In addition to the many other advantages Winnipeg supplies, through its Municipal Hydro-Electric system, the cheapest electric power of any city in America.

The source of Winnipeg's new water supply is Shoal Lake in the northwest angle of the Lake of the Woods, having a drainage of about 360 square miles and water surface of 107 square miles. Shoal Lake is connected with the main lake at Ash Rapids.

The Lake of the Woods has a drainage area of about 27,700 square miles and a water surface of about 1,500 square miles, the drainage basin of Shoal Lake—360 square miles.

The Lake of the Woods constitutes an enormous reservoir of pure and soft water, situated 300 feet above the City of Winnipeg within one hundred miles of the City.

The new aqueduct is capable of delivering to Winnipeg 85 million gallons of soft water per twenty-four hours.

The Winnipeg Stock Yards are the largest in Canada, and represent an investment of over $1,000,000. There are five and one-half miles of alley-ways, six and one-half miles of railway track, six miles of sewers, and five miles of watermains at the stock yards.

Winnipeg has 52 public schools, with an attendance of 33,387; 6 colleges; the Provincial agricultural college, built at a cost of $4,000,000.00; the University of Manitoba; art gallery; bureau of arts and arts museum; permanent exposition of products manufactured in the city; 3 libraries with 32 branches.

The City of Winnipeg dominates the markets of the entire Western Provinces of Canada. Her geographical situation makes her the pivot point from which the trade of this vast inland empire swings. Winnipeg holds the keys to the world's greatest growing market. She is the veritable pulse of trade west of the Great Lakes. Nothing can change this fortunate situation. No force can relieve this "keystone of Western trade" of the unique advantages she possesses in the Western world. Experience has long since proven that goods passing from East to West must of necessity go through Winnipeg, and so too the products of the prairies must find their outlet here as well. Thus Winnipeg has become the greatest transportation centre in the Dominion of Canada.

WATERWORKS

The first water works system in the city was installed and operated by a private concern, The Winnipeg Water Works Company, the source of supply being the Assiniboine River, and the pumping station was located at Armstrong's Point. This Company obtained its charter on December 30th, 1880, but the works were not put in operation until 1882. The franchise was exclusive and for a term of twenty years.

In April, 1899, the city purchased the Water Works Company's plant for the sum of $237,650. Immediately upon taking over this system the city decided to change the source of supply, and an artesian well system was placed in operation in October, 1900. The well system consisted of a chain of wells on a line running in a northwesterly direction from the city. The pumping capacity of the several wells was in excess of 12,000,000 gallons per day. Upon completion of the Shoal Lake Water System the city discontinued the use of the artesian wells, but several of the larger wells are maintained as a standby ready for operation in case of interruption to the new supply.

Shoal Lake water was turned in to the McPhillips Street reservoir at 10.30 a.m. on March 29th, 1919, and distribution through the city mains commenced on April 5th, 1919.

The pumping station and reservoirs are located on McPhillips Street, north of Logan Avenue.

Reservoirs

No. 2 ..... 6,000,000 gals. capacity
No. 3 .....18,000,000 gals. capacity

The fire service water works has a capacity of 12,960,000 gallons per day against 300 lbs. pressure. This service is operated by 2,500 h.p. gas engines. There are ten miles of high pressure water mains in the business districts and 157 special hydrants.

Henderson's Winnipeg Street and Avenue Directory 1921

This section of the Directory is presented in condensed form. Full information will be found in the Alphabetical Section.

AVENUES all run East and West, and are numbered under 200 East of Main Street, Main to Princess 200 to 300, West of Princess 300 and upwards.

STREETS running North and South are numbered from the Assiniboine River as a base Northwards, and again from Notre Dame as a base Northwards.

The word "street" is always implied.
